

Cub Mfg News 8-28-15

By Mr. Ryan Lamb and Students

4th Week of School

We would like to say a **HUGE THANK YOU** to Koehler

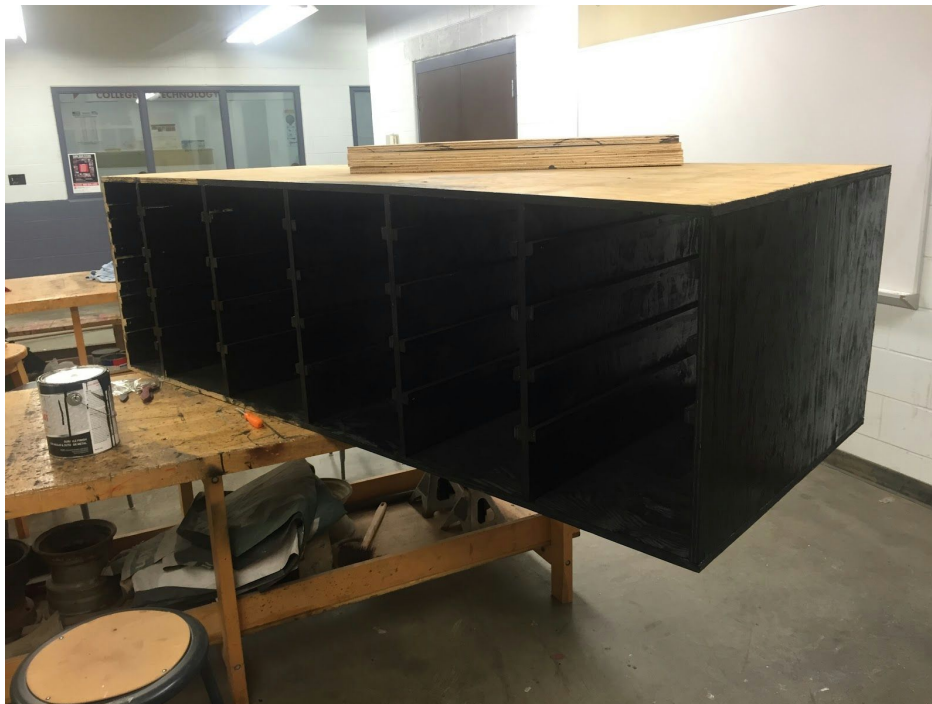

Welding Supply for outfitting our class with new Weldmark Welding Helmets, Green Welding Jackets, Leather Welding Gloves, Leather Driver Gloves, Safety Glasses, Shade 5 Cutting Glasses, Mig Pliers, Tip Cleaners, Strikers, Wire Brushes, Chipping Hammers, Tape Measures, Flashlights, and Casters for our welding tables. They are also donating 2 new Millermatic welding machines. We are very appreciative of the support that Dave Ungru and his team at Koehler Welding Supply has given Cub Manufacturing.

*The students wearing shorts weren't welding, we were so excited we just had to get a photo.

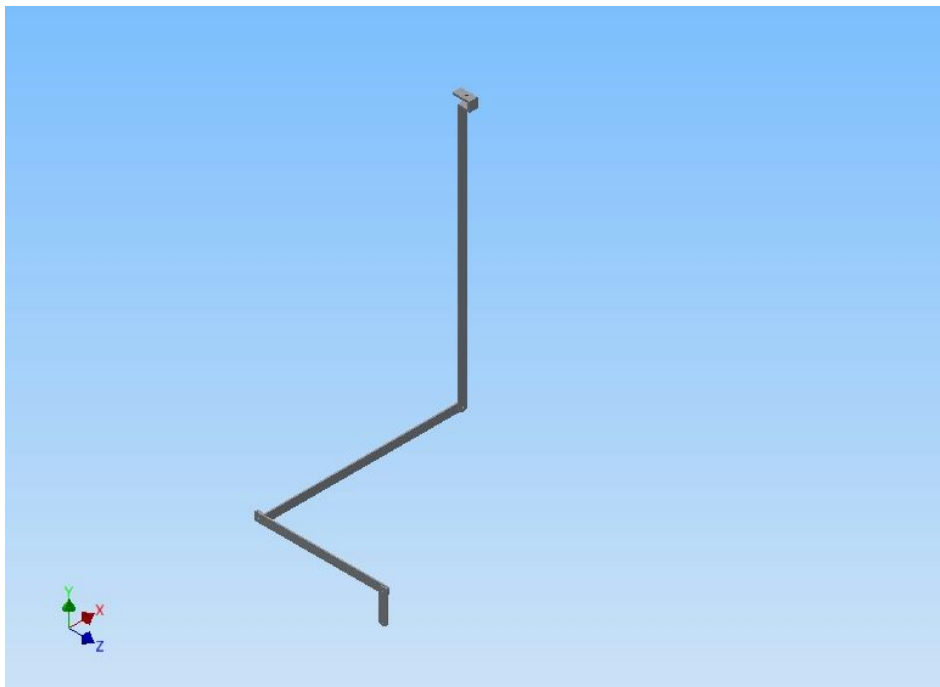

The maintenance men have been hard at work preparing the Amatrol lab with proper electrical outlets.

We are finishing painting our storage rack system.

We have are working on the frames for our welding tables. We will have a total of 4 tables, 1 for each welder.

We have also been working on an exoskeleton for the ventilation system so we can place the ductwork opening in a location and have it stationary, and be able to move it to a new location and have it be rigid there as well.

**Thank you again
Koehler Welding Supply**
